Professional Profile

PhD candidate in Information Technology (Learning Analytics) at Monash University, researching how AI can support learner-centred feedback and student learning in higher education. My work combines generative AI and LLM evaluation, educational NLP, machine learning, authentic assessment data, and quantitative and text-analytic methods. I have first-author publications in leading educational research journals, including *Computers & Education*, *Computers and Education: Artificial Intelligence*, and *Assessment & Evaluation in Higher Education*, alongside university teaching experience in Australia and Indonesia.

Research Expertise

- **Learner-centred feedback and learning sciences:** Operationalised Future Impact, Sensemaking, and Agency in feedback, including actionable guidance, explanation, learner agency, and supportive interaction.
- **Generative AI and LLM evaluation:** Designed and evaluated LLM-based feedback workflows across prompting conditions; compared AI-generated and teacher feedback using pedagogical and linguistic measures.
- **Educational NLP and dataset curation:** Curated and annotated authentic higher-education feedback and student-work datasets; applied supervised and multilabel classification, BERT-based modelling, and validation procedures.
- **Learning analytics and student outcomes:** Applied statistical and text-analytic methods to feedback, educator–AI interaction, student revision actions, and subsequent academic performance.

Doctoral Research

Five connected studies examine learner-centred feedback, AI-supported analysis, educator–AI interaction, and student outcomes.

- **Study 1 | Mapping learner-centred feedback.** Analysed authentic higher-education feedback, its alignment with learner-centred components, and patterns across student groups. **Published in *Computers & Education* (2025).**
- **Study 2 | Automating feedback analysis.** Developed and evaluated machine learning and NLP approaches to classify learner-centred feedback; BERT-based classifiers achieved Cohen's κ up to 0.956 and F1 up to 0.998. **Published in *Computers and Education: Artificial Intelligence* (2024);** implemented in PolyFeed.
- **Study 3 | Human and LLM-generated feedback.** Analysed 5,156 human- and LLM-generated feedback texts on 1,289 student proposals, comparing pedagogical characteristics and linguistic features across prompting strategies. **Under review.**
- **Study 4 | Teacher–AI collaboration.** Investigated educators' interaction with and perceptions of AI-supported feedback in PolyFeed, focusing on use, revision, trust, ethics, and usability. **Published in *Assessment & Evaluation in Higher Education* (2026).**
- **Study 5 | Feedback and student outcomes.** Analysed assessment and feedback data from 1,946 students across three teaching semesters to examine associations between learner-centred feedback components, student revision actions, and subsequent academic performance. Manuscript in preparation.

Research Output

- **PolyFeed | AI-supported feedback analytics system.** Includes the machine learning model I built in Study 2 to classify learner-centred feedback; used in my doctoral research on automated feedback analysis and educators' interaction with AI-supported feedback tools. PolyFeed team

Academic Appointments

- **Teaching Associate** | Monash University, Faculty of Information Technology — Feb 2023 – Present
  Teach postgraduate data science, including FIT5145 since 2023. Facilitate tutorials and consultations, assess assignments and examinations, and give constructive feedback to support learning.
- **Lecturer (Assistant Professor)** | Universitas Teknokrat Indonesia — Sep 2019 – Present
  Teach undergraduate data mining, statistics, data visualisation, data warehousing, and data science. Design syllabi, learning objectives, and assessments; supervise student research and theses; contribute to curriculum development.
- **Assistant Lecturer** | Universitas Lampung — Sep 2013 – Sep 2015
  Supported undergraduate and graduate teaching in information technology and programming through tutorials, assessment, student guidance, and course planning.

Education

- **PhD, Information Technology (Learning Analytics)** | Monash University, Australia — Jan 2023 – Present
  Centre for Learning Analytics. Thesis submission: December 2026.
- **Master of Mathematics** | Universitas Lampung, Indonesia — Sep 2017 – Apr 2019
  Thesis: Study on Metric Dimensions on a Graph and Its Applications.
- **Bachelor of Mathematics** | Universitas Lampung, Indonesia — Sep 2012 – Dec 2015

Technical Skills and Research Methods

- **Programming and analytics:** Python, R, SQL, SPSS, NVivo, Tableau, Excel, MATLAB, Unix/Bash, LaTeX.
- **AI and NLP:** BERT, XGBoost, random forest, supervised and multilabel classification, LLM API workflows, prompt design, text analytics.
- **Research methods:** Statistical analysis, qualitative thematic analysis, learning analytics, dataset annotation, model validation.

Academic Service

Member, Society for Learning Analytics Research (SoLAR), 2024–present. **Peer reviewer (2024–2026):** *Computers & Education: Artificial Intelligence*; *Teaching and Teacher Education*; *Education and Information Technologies*; *Assessment & Evaluation in Higher Education*; *Heliyon*; *Cogent Business & Management*.

Publications
